Education

University of Delaware

Expected August 2026

Ph.D. Economics

M.S. Economics and Applied Econometrics

May 2024

Lahore University of Management Sciences (LUMS)

May 2021

BSc (Honors) Economics Minor: Mathematics

Work Authorization: U.S. Permanent Resident

Skills

Tools: STATA, R, Python, SQL, LaTeX, Excel, Git

Methods: Causal Inference, Quasi-Experimental Methods, A/B Testing, Experimental Design

Working Papers

- The Impact of Trade Liberalization on Manufacturing Firms: Evidence from Pakistan. [Abstract]
- Causal Impact of Barter Trade Policy during a Foreign Exchange Reserves Crisis. [Abstract]
- Towards win-win: Evidence from commercial dispute resolution in India. [Abstract]

Research Experience

Research Assistant

June 2024 – Present

University of Delaware — Coauthor with Prof. Rao

- Applied Judge IV strategy to estimate causal effects of judicial decisions on firm outcomes.
- Built reproducible pipelines to clean and merge court records with firm financial data in Stata and R.
- Developed identification strategies grounded in quasi-experimental variation for policy evaluation.

Research Assistant

June 2025 – Aug 2025

- Constructed a longitudinal PSID panel from raw administrative data for causal policy analysis.
- Built comprehensive replication files to ensure full reproducibility of empirical findings.
- Strengthened skills in managing large-scale panel data infrastructure and automated workflows.

Research Assistant

July 2021 – Aug 2021

University of Manchester

- Extracted and cleaned administrative tax records using web scraping for causal inference research.
- Supported empirical analysis of public policy using quasi-experimental identification strategies.

Industry Experience

AI Automation Consultant

Sep 2025 – Present

TeamLift

- Designed and deployed AI workflow automations and agents using Codex, Claude code and Make.com.
- Advise client teams on integrating AI-supported tools and agent-based flows to accelerate operations.
- Deliver measurable efficiency gains by building scalable automation solutions for diverse stakeholders.

Data Researcher

Aug 2021 – July 2022

Unison Infrastructure

- Led geospatial data collection and processing pipelines supporting data-driven investment decisions.
- Designed infrastructure to clean and integrate satellite imagery with administrative records at scale.

Teaching Experience

Instructor of Record

Principles of Macroeconomics, University of Delaware

Summer 2026

Economics Issues and Policies, University of Delaware

Winter 2026

Teaching Assistant — Graduate Level

Econometric Theory, University of Delaware

Spring 2024

Microeconomic Theory I, University of Delaware

Fall 2023
